

Orbility® Multipark

## Reflex CM 420 Cashier Terminal and Reflex SC 420 Coding Station

The Cashier Terminal is used for payment on foot or from vehicle at exit. It can process all types of transactions and accept all means of payment. The Cashier Terminal also allows encoding of all types of tickets and cards.

This equipment is part of the Orbility® Multipark system.

### Features

- Manages all types of transactions:
- Hourly parking: payment for regular or lost ticket.
- Pass-cards: payment for subscriptions and renewals, parking overstay payment.
- Conference and event tickets: sale, parking overstay payment.
- Sale of vouchers and Prepaid cards (in time or money, usable at entry/exit or as means of payment).
- Various payment methods: cash, cheque, prepaid cards, vouchers, credit and debit cards.
- Used for payment on foot or from vehicle at exit at manned kiosk.
- Allows encoding of all types of tickets or cards: hourly tickets, pass cards, conference and event tickets, vouchers, prepaid cards.
- Cashier management using secure access codes and independent work sessions (shifts) enables transactions carried out by each cashier operator to be tracked for audit purposes.
- Automatic or manual receipt printing.
- Automatic or manual end of shift status report print out.
- Record of transactions through Orbility® Multipark Central Management System.

## Technical Features

- Power supply: 120/230 V – 50/60 Hz – 500 VA.
- Operating temperature range: +10 °C to +35 °C.

## Technical and Hardware Description

- The Cashier Terminal includes the following features:
- Centred magnetic head providing two way ticket insertion.
- HiCo/LoCo encoding.
- Printer for receipt printing.
- Cash drawer.
- Customer fee and date/time display.
- Standard desktop PC, with TFT flat screen monitor (when the Cashier terminal is integrated with the database server only one PC is required).

## Options

- Payment by credit card – Chip and PIN (terminal provided separately).
- Serial coding of tickets with the coding station SC420 (instead of the CM 420 cashier terminal). In addition to the functionalities offered by the Cashier Terminal CM420, the coding station SC 420 features a ticket feeder and burster module and a locked cabinet containing up to fan fold 4000 tickets.
- Cashier Terminal can be integrated with the server or operate as a workstation (please refer to the product sheet of the Central Management System).
- Mifare® contact less card reader for subscribers.
